SUMMARY

A Computer Science graduate from Syiah Kuala University (USK) with a GPA of 3.45 and a strong background in Fullstack Web Development, specializing in Backend Development. Experienced in designing and developing scalable web applications using modern technologies, including RESTful APIs, database management, and server-side architecture. Proficient in building secure, efficient, and maintainable backend systems while also capable of developing responsive frontend interfaces. Passionate about solving complex problems, continuously learning new technologies, and collaborating effectively in cross-functional teams to deliver high-quality software solutions.

EDUCATION

Syiah Kuala University

Graduated Jan 2026

Bachelor of Science in Computer Science (GPA: 3.45 / 4.00)

Banda Aceh, Aceh

- **Relevant Coursework:** Web Development, Frontend Development, Backend Development, DevOps, Mobile App Development.

EXPERIENCE

Bangkit Academy

Feb 2024 – Jun 2024

Mobile Development

- Developed expertise in mobile app development using Kotlin, including hands-on projects in creating dynamic and responsive Android apps.
- Worked collaboratively on the final project, Semaroam, a travel recommendation app for the Semarang area.
- Improved problem-solving skills by addressing real-world mobile app development challenges, optimizing app performance, and ensuring a user-friendly interface.

Aceh Provincial Social Affairs Office

Jul 2024 – Aug 2024

Backend Developer Intern

- Developed backend services using Node.js and Express.js.
- Designed MongoDB database schemas and optimized data management workflows.
- Built RESTful APIs to support secure and scalable data processing.
- Implemented validation and authentication mechanisms to ensure data integrity and access control.

PROJECTS

Diaz Sport Center | *Online field booking system*

- Developed a backend booking platform using the MERN Stack.
- Designed RESTful APIs for scheduling, availability, booking, and payment workflows.
- Developed a robust database architecture using MongoDB with Mongoose ODM for efficient data modeling and querying.
- Implemented authentication and authorization for secure access control.
- Optimized MongoDB queries to improve performance under concurrent reservation requests.
- Built booking status notifications and validation mechanisms to ensure data integrity.

PPKS & TKSK | *Social Welfare Service Requirement System at the Aceh Social Services Office*

- Developed a web-based employee management and daily activity reporting system for the Aceh Social Services Agency using Express.js and Node.js.
- Built a comprehensive database architecture using MongoDB with optimized query performance.
- Implemented a secure authentication system with role-based access control for various user levels.
- Created an approval workflow system for employee data updates with status tracking functionality.
- Integrated a data validation mechanism to ensure data integrity and prevent duplication.

Semaroam | *Tourism recommendation application for the Semarang area.*

- Developed a travel recommendation application for the Semarang area.
- Implemented machine learning models to categorize tourist attractions based on preferences.
- Integrated these models into an Android application, allowing users to identify and search for information related to tourist attractions in Semarang.
- Added a feature that displays tourist attraction history and ratings from previous visitors.

Si-Pidana-Q | *Integrated Qanun Case Information System for Banda Aceh Satpol PP and WH.*

- Developed an Information System for the Investigation and Inquiry into Qanun Violations Banda Aceh City Public Order and Sharia Police (Satpol PP & WH).
- Implemented Google Sheets and Google Drive as the data storage solution.
- Developed automation scripts using Google Apps Script.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP, Kotlin, HTML, CSS.

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Mongoose ODM.

Frontend: React.js, Laravel, Bootstrap, Tailwind CSS.

Databases: MongoDB, PostgreSQL.

Tools: Git, GitHub, Postman, Visual Studio Code, Google Apps Script.

Office & Productivity: Microsoft Office (Word, Excel, PowerPoint), Canva.

ORGANIZATIONAL INVOLVEMENT

Member of the Department of Community Social Affairs

2023 & 2024

Syiah Kuala University

Banda Aceh, Aceh

- Assisted in planning, coordinating, and implementing structured work programs that align with organizational goals.
- Built and managed partnerships with local stakeholders, including Sub-District Heads, School Principals, Village Heads, and regional sponsors.
